- 16 gallon (60 litre) re-circulating system
- Available in various electrical configurations, for U.S. domestic and international operation.

- Metmaster, the Metallographic division of Lapmaster International, is proud to announce the introduction of their new abrasive cutter, the MASTERCUT-1200. This is the first piece of equipment to be introduced from Metmaster's newly designed line of Metallographic equipment and is expected to be a leader in its class.
- The MASTERCUT 1200, which is available in both a manual and fully automatic versions, will use a 12" (305mm) cutoff wheel and have a cutting capacity of 4" (100mm) of solid bar stock. This machine will be unique in available table-top cutters, having a robust, compact and high torque 5hp motor, making it considerably more powerful than comparable cutters on the market.
